Office Action Summary	Application No. 10/531,929	Applicant(s) KLEIN MIDDELINK ET AL.	
	Examiner DAVID CZEKAJ	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

Claims 8-9 are objected to because of the following informalities: Claims 8-9 are written in independent form however appear to be dependent claims. Appropriate correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-2 and 6 are rejected under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent and recent Federal Circuit decisions indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. While the instant claim recites a series of steps or acts to be performed, the claim neither transforms underlying subject matter nor is positively tied to another statutory category that accomplishes the claimed method steps, and therefore does not qualify as a statutory process. For example, it is unclear what performs, in electronic form, the forming, reading, and providing steps recited in the method claims.

Claims 4-5 are rejected under 35 U.S.C. 101 because the claim is directed towards a signal which is non-statutory subject matter (Please see the MPEP 2106 Section IV. Determine Whether the Claimed Invention Complies with 35 U.S.C. 101).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kim (7340762).

Regarding claim 1, Kim discloses an apparatus that relates to digital television networks (Kim: column 1, lines 17-20). This apparatus comprises “forming an embedded data descriptor for signaling content in the embedded data” (Kim: column 5, lines 29-37; column 7, lines 1-5) and “providing the main data descriptor outside the embedded data and embedded data descriptor” (Kim: column 6, lines 5-20; column 7, lines 1-5). While Kim fails to explicitly show the main data descriptor outside the embedded data, Kim does disclose the main data can be embedded in other descriptors (Kim: column 7, lines 1-5). Since the main data can be embedded in other descriptors, the main data is outside the other embedded data. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to implement the main data outside the embedded descriptor in order to more clearly indicate/mark the main data.

Regarding claim 2, although not disclosed, it would have been obvious to provide enhancement data (Official Notice). Doing so would have been obvious in order to help increase the quality of the video data.

Regarding claims 3-9, note the examiners rejection for claim 1.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
